📄 Software Development Feature & Change Tracking Document

🗒️ Project Basic Information

- **Project Name: WatchSphere Mobile Application**
- **Client Name: Freezy Freez**

🧩 Core Feature List (Initial Scope)

Note: List all confirmed features as discussed with the client at the project initiation.

User Features list:-

1. End User (Buyer / Watch Trader)

Search & Discovery

- **Search Products Across Platforms**:

  Allow users to search products across multiple platforms like eBay, Grailzee, and Chrono24 for watches.

- **Keyword-based Search**:

  Enable search based on watch name, model, brand, or other relevant terms.

- **Multi-Platform Aggregated Results**:

  Display results from eBay, Grailzee, and Chrono24 together in one interface for a seamless experience.

Advanced Filters

- **Year Filter**:

  Users can filter watches by the manufacturing year.

- **Price Range Filter**:

  Allow users to define a specific price range for search results.

- **Location Filter**:

  Filter results by location (country or region).

- **Condition Filter**:

  Filter by condition, such as new, used, or refurbished.

- **Keyword Refinement**:

  Narrow down results using additional keyword refinements for better accuracy.

- **Sold vs Active Listings**:

  Option to display either sold listings or only currently active listings.

- **Custom Time Range Selection**:

  Enable users to define a specific time range for the listings (e.g., past month, quarter, etc.).

Analytics & Insights

- **Lowest Price in Selected Time Range**:

  Provide insights into the lowest price found for the selected time range.

- **Highest Price in Selected Time Range**:

  Show the highest price recorded in the selected time period.

- **Average Price Calculation**:

  Calculate and display the average price of listings in the chosen range.

- **Basic Trend Insights**:

  Provide basic insights into price trends over time.

Listings Interaction

- **Direct Links to Listings**:

  Users can click to visit the actual listing page on the respective platform.

- **View Product Details**:

  Show detailed information about each watch listing, such as description, condition, and specifications.

- **Save/Bookmark Listings**:

  Allow users to save listings for future reference.

- **Save Searches**:

  Enable users to save specific search parameters for easy access in the future.

Image-Based Search (Phase 2)

- **Upload Watch Image**:

  Allow users to upload a picture of a watch they are looking for.

- **Find Visually Similar Listings**:

  Use image recognition to find listings that are visually similar to the uploaded image.

Notifications & Alerts

- **New Listing Alerts**:

  Notify users when a new listing is posted for a watch they are interested in.

- **Price Drop Alerts**:

  Notify users when the price of a saved or searched listing drops.

- **Saved Search Updates**:

  Alert users when there are updates to saved searches or related listings.

Account & Profile

- **User Registration/Login**:

  Support user registration and login via email or social login.

- **Profile Management**:

  Allow users to edit and manage their account information.

- **Search History Tracking**:

  Track user search history for personalized recommendations.

Subscription-Based Access

Free Plan:

- Limited searches (5/month).
- Basic filters.
- Ads.

- Limited analytics.

Paid Plan:

- Unlimited searches.
- Advanced filters.
- Full analytics.
- Image search.
- Ad-free experience.

Admin Features

User Management

- **View All Users**:

  Admins can view the list of all users on the platform.

- **Edit/Deactivate Users**:

  Admins have the ability to modify user details or deactivate accounts.

- **Assign Roles and Plans**:

  Admins can assign roles (e.g., admin, user) and subscription plans to users.

Subscription Management

- **Create Pricing Plans**:

  Admins can create, modify, or remove subscription plans.

- **Manage Billing Cycles**:

  Admins can manage subscription renewal cycles, billing, and payments.

- **Control Feature Access per Plan**:

  Different plans (Free, Paid) will have different feature access. Admins control which features are accessible for each plan.

- **View Payment History**:

  Track payment history for each user to monitor subscription status.

Platform Control

- **Manage Supported Marketplaces**:

  Admins can add or remove supported marketplaces (eBay, Grailzee, Chrono24).

- **Configure Filters and Categories**:

  Admins can set up, modify, or remove available filters and categories.

- **Control Feature Toggles**:

  Enable or disable specific features across the platform.

Analytics & Reporting

- **User Activity Tracking**:

  Admins can track user interactions and activity on the platform.

- **Search Volume Analytics**:

  Track the most popular search queries and trends.

- **Revenue Reports**:

  Generate revenue reports based on subscriptions and user activity.

- **Platform Usage Insights**:

  Admins can access insights into how the platform is being used by customers.

Content & System Monitoring

- **Monitor API Usage**:

  Track and monitor API usage across platforms.

- **Error Logs**:

  Keep logs of system errors and provide troubleshooting options.

- **System Health Tracking**:

  Monitor system performance and ensure it is operating smoothly.

3. Automation Module (Compliant)

Social Posting

- **Facebook Group Posting via Approved APIs**:

  Enable the automation of social media posting to Facebook groups using approved APIs.

- **Post Scheduling**:

  Admins can schedule posts to be published at a later date and time.

- **Campaign Management**:

  Create, manage, and track social media campaigns through the platform.

Tracking

- **Post Performance Tracking**:

  Track the success of posts, including engagement metrics such as likes, shares, and comments.

- **Engagement Monitoring (Where Allowed)**:

  Monitor engagement on posts, keeping within legal restrictions of each platform.

📝 Additional Features

1. **Organizations Map** : service provider under same organizations ($300)

✅ Client Approval & Confirmation

I confirm that I have reviewed and approved the features and change requests listed above.
